

FLEX-ING

FIREFLEX™

AVAILABLE WITH THE FIREFLEX 346 SWIVEL

FireFlex flex connector:

- All metal construction means one flex connector for both **Above And Below Ground Applications.**
- **UL Listed** for above and below ground installation.
- An 18-8 alloy with titanium, **321 Stainless Steel** innercore provides longer service life.
- Standard wall thickness with close pitch corrugations gives more flexibility.
- The **346 Integral Male Swivel*** insures ease of installation with a multi-seal design.
- Actual **375 psig** working pressure assembly, exceeds **UL 50 psig** requirement.
- **NFPA 30 & 30A** compliant for fire resistance.
- Thick, schedule 80 end fittings protect against deformation of the ends.
- 100% pressure tested to assure quality.
- The innercore is hydroformed.
- Tee's, sweep elbows, and other end fittings are available.
- Minimum bend radius from the centerline is 6".
- Crush and kink resistant, collapse proof and rated for full vacuum service.
- Braid limited.

Other lengths and configurations available call for details.

*patent pending

The **346 Integral Male Swivel** Is Made To Make Installation Easier. The **346 IMS** Is Constructed Of ASTM High Grade Carbon Steel. Sealing Protection Is Provided By 3 Viton Quad Rings At Six Sealing Points.

Do Not Torque Flex Connector
Install In One Plane Of Motion
Do Not Exceed Minimum Bend Radius
